

Quality Springwater

Our Environment

- Neverfail has Springwater sources in all mainland states of Australia, located within approximately 100 km of each bottling site.
- Neverfail is committed to sustainable use of its water sources; we invest in infrastructure and hydrogeological studies of our Springwater sources.
- 'Neverfail' 11 litre and 15 litre bottles are collected at each delivery, returned to the bottling plant, thoroughly washed and sanitised, and refilled an estimated 30 times over several years of use.
- At Neverfail, we use 1.3 litres of water to produce 1 litre of bottled Springwater, well below the Coca-Cola System world beverage average of 2.16 litres*.

*2011/2012 TCCC Sustainability Report

Our Quality

- Neverfail Springwater Limited is a wholly-owned subsidiary of Coca-Cola Amatil Limited, the bottler of the 'Coca-Cola' Brand in Australia. We pride ourselves on the high standards of our products and services.
- 'Neverfail' Springwater is sourced from some of the finest aquifers in Australia.
- As a founding member of ABWI (Australasian Bottled Water Institute), we aim to ensure that 'Neverfail' Springwater complies with the strictest quality standards for bottled water.
- Neverfail bottling plants conform to international standards including ISO-9001 Quality Management Systems, ISO-22000 Food Safety Management Systems and Hazard Analysis Critical Control Point.

'Neverfail' has achieved ABWI's 'Order of Excellence' across all bottling sites from 2003 – 2014.
